Second Call for Papers
Nineteenth International Conference on Text, Speech and Dialogue
TSD 2016
September 12–16, 2016, Brno, Czech Republic

TSD 2016 is organized by the Faculty of Informatics, Masaryk University, Brno, and the Faculty of Applied Sciences, University of West Bohemia, Pilsen. The conference is supported by International Speech Communication Association.

Venue: Brno, Czech Republic

TSD series evolved as a prime forum for interaction between researchers in both spoken and written language processing from all over the world. Proceedings of TSD form a book published by Springer-Verlag in their Lecture Notes in Artificial Intelligence (LNAI) series. TSD Proceedings are regularly indexed by Thomson Reuters Conference Proceedings Citation Index. LNAI series are listed in all major citation databases such as DBLP, SCOPUS, EI, INSPEC or COMPENDEX.

CBBLR Workshop: The TSD 2016 conference will be accompanied by a one-day satellite workshop Community-based Building of Language Resources. The CBBLR workshop submissions will undergo two separate review processes – the best papers which will succeed in both review processes (by the TSD Conference PC and CBBLR Workshop PC) will be published in the TSD Springer Proceedings, all other accepted CBBLR workshop papers will be published in a separate proceedings with ISBN.

Topics: Topics of the conference will include (but are not limited to): Corpora and Language Resources (monolingual, multilingual, text and spoken corpora, large web corpora, disambiguation, specialized lexicons, dictionaries); Speech Recognition (multilingual, continuous, emotional speech, head-mounted speaker, out-of-vocabulary words, alternative way of feature extraction, new models for acoustic and language modelling); Tagging, Classification and Parsing of Text and Speech (morphological and syntactic analysis, synthesis and disambiguation, multilingual processing, sentiment analysis, credibility analysis, automatic text labeling, summarization, authorship attribution); Speech and Spoken Language Generation (multilingual, high fidelity speech synthesis, computer singing); Semantic Processing of Text and Speech (information extraction, information retrieval, data mining, semantic web, knowledge representation, inference, ontologies, sense disambiguation, plagiarism detection); Integrating Applications of Text and Speech Processing (machine translation, natural language understanding, question-answering strategies, assistive technologies); Automatic Dialogue Systems (self-learning, multilingual, question-answering systems, dialogue strategies, prosody in dialogues); Multimodal Techniques and Modelling (video processing, facial animation, visual speech synthesis, user modelling, emotions and personality modelling);

Papers on processing of languages other than English are strongly encouraged.
